services and authoritative resolution for the .com and .net top-level domains, which support the majority of global

ABOUT VERISIGN II II in 🔊 Verisign enables the security, stability, and resiliency of key internet infrastructure and services, including providing

eric TLD, ngTLD and ccTLD data cited in the brief: (i) includes ccTLD internationalized domain names, (ii) is an estimate as of the time the brief uped and (iii) is subject to change as more complete data is received. Some numbers in the brief may reflect standard rounding. 3 Line break indicates that the .com line has been shortened for display considerations.

4 The domain name base is the active zone plus the number of domain names that are registered but not configured for use in the respective TLD zone file plus the number of domain names that are in a client or server hold status. The .com and .net domain name registration figures are as reported in Verisign's
